Do you want to play a major role in developing further the activities of a company operating successfully in the Swiss home market and internationally?

Mathematician/Software Engineer

We offer you

the opportunity in your role as a consultant/programmer with a specialized knowledge in numerical Mathematics, Statistics or Informatics to share in the planning and implementation of large-scale projects for Energy institutions. You will be required to travel both in and outside Switzerland. Your work environment will afford you great scope for manoeuvre and a chance to prove the flexibility that goes with it. You will be well compensated financially and your salary will be commensurate with your work performance.

You hold a university degree (Swiss Polytechnic, Trade University or other)

are familiar with the programming language C# or Java, preferably also FORTRAN and have already gained experience in the area of Operations Research. German and English, both spoken and written, are a must. Besides these qualifications, it is important to be able to communicate well and to think performance-oriented. Prior experience in the field of energy is an advantage.

Are you interested?

Our team (jobs@time-steps.com) will be glad to receive your complete personal documentation.
